

RECOMINTE's History & Brazilian Aeronautical Market Overview

Who's Recominte?

RECOMINTE was founded in Rio on July 04, 1990, by Jacques C. de Albuquerque, a mechanical engineer graduated in 1984 and started in aviation in 1985, but always with Sales and Marketing on its DNA.

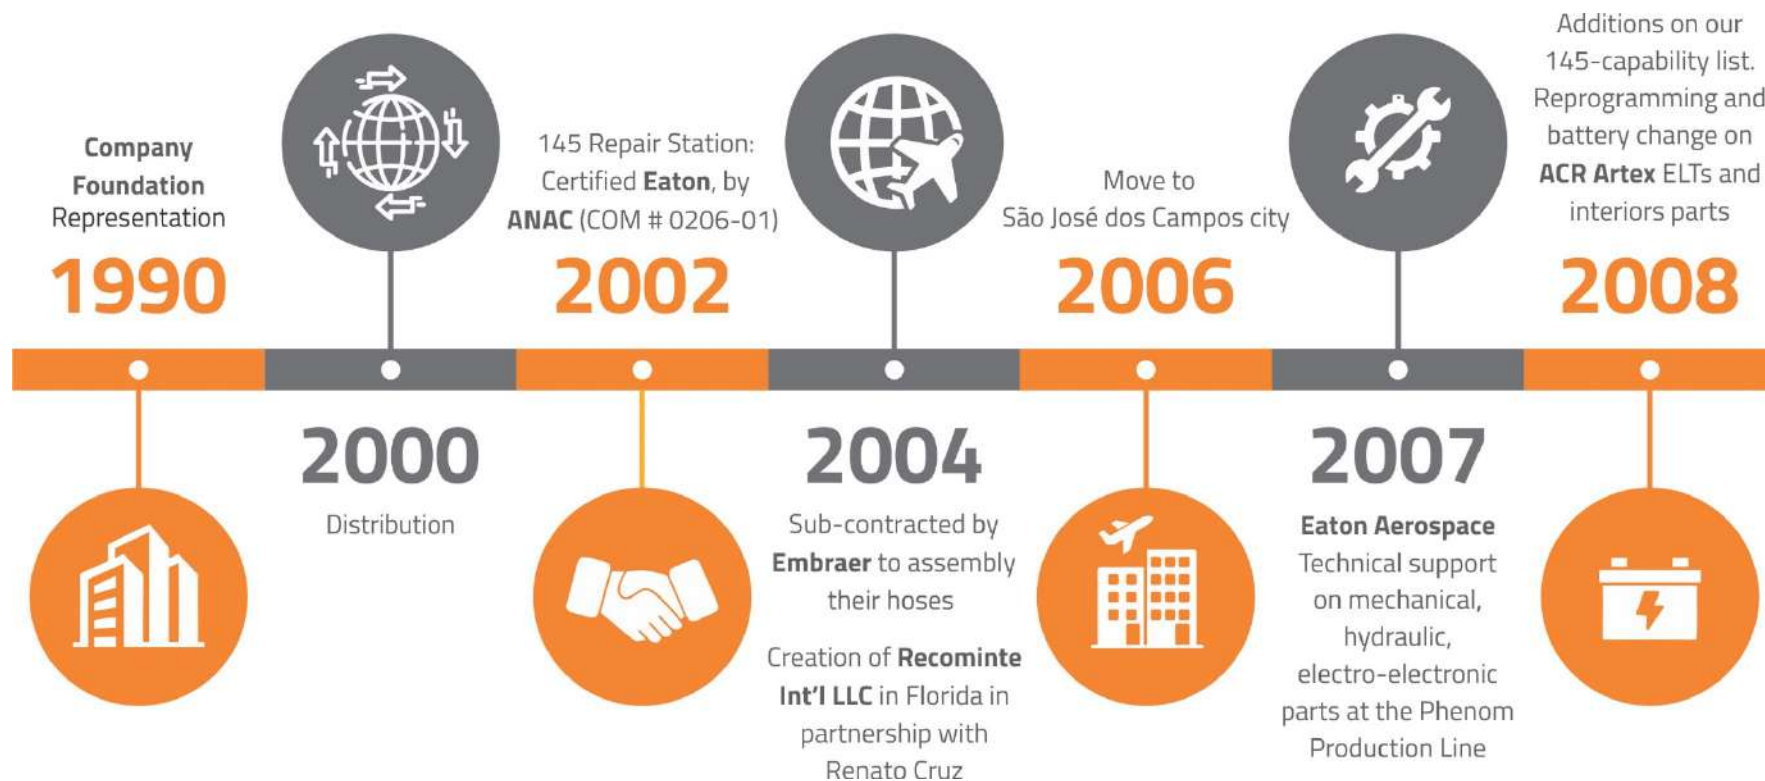

We originally started only as representatives of a variety of companies that could satisfy most needs of the aircraft and helicopter manufacturing and maintenance market.

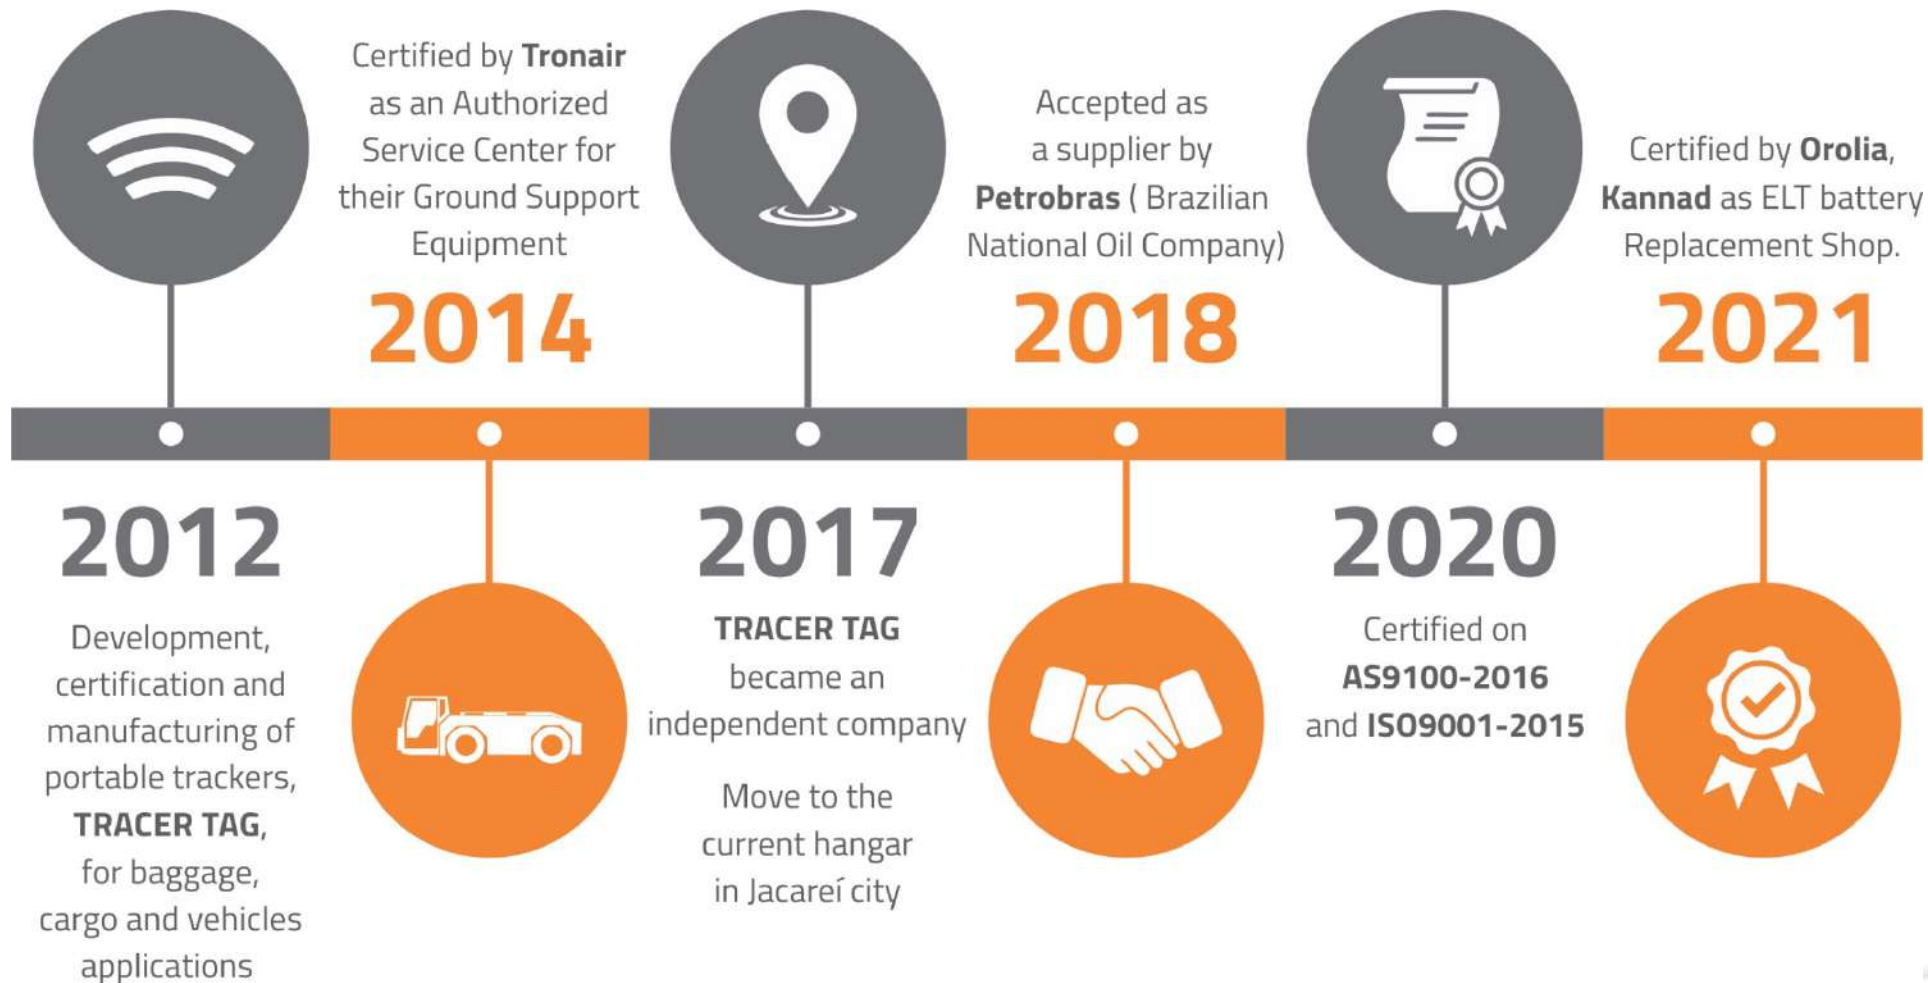

Recominte's Chronology

To better support the market requirements and add value to our principals' brands and product lines, other distinct activities, besides representation, were added to our work capabilities, on the following chronology:

Recominte's Chronology

Recominte's History

1990

1994

1998

Recominte's History

São José dos Campos 2006 - 2017

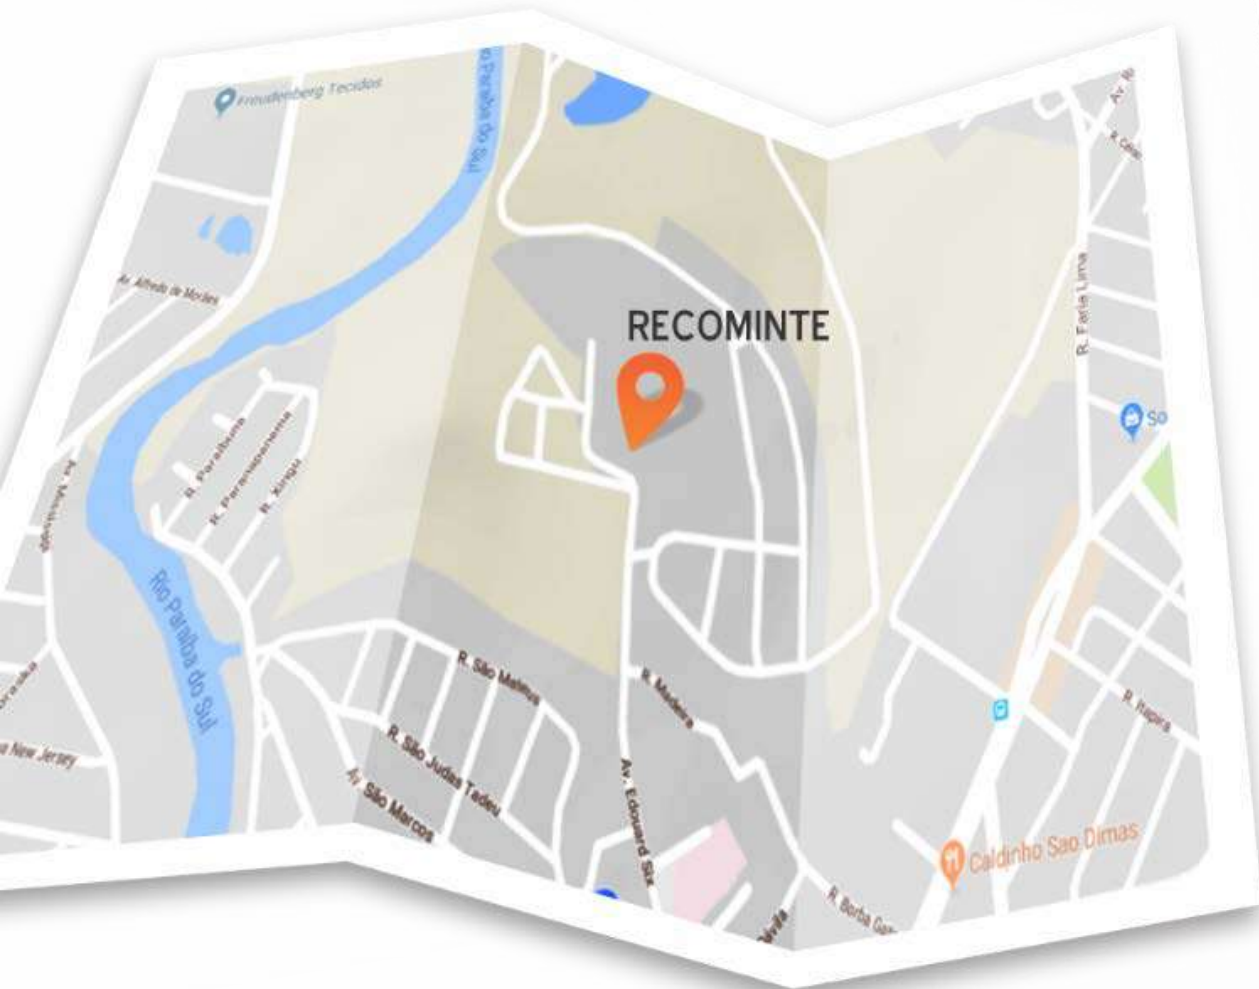

**Rio at
Jacarepaguá
Airport
1999 - 2006**

Current Location

Jacareí, SP - 30 Km closer to São Paulo and 27 Km to the Embraer

Current Location

What Recominte can do for you in Brazil?

- 1 - Representation
- 2 - Distribution
- 3 - ANAC 145 Repair Station
- 4 - Technical Support & Training
- 5 - Mechanical and Electrical Assemblies

Representation experiences

Working exclusively as representatives for the first 10 years, we dealt with fire detection and extinguishing systems, ELTs, materials and products, such as aluminum, titanium, paints, sealants and composites.

We successfully achieved many LTAs with Embraer and the main airlines at the time, VARIG group, which included RIO SUL and NORDESTE, as well as VASP, TRANSBRASIL and TAM.

Our Activities as Representatives

- We place a high priority in accompanying our principals on all the phases of any project, helping them on the day-to-day activities, from the qualification of new products, thru RFQs, up to the collection of the invoices.
- Visiting our main customers with our principals it is also a priority on our sales strategy.
- Since 1994 we have exhibited in more than 40 airshows, being three in Chile, three in Paris. We also participated in many others as visitors, in Brazil and abroad.
- We have eventually advertised on print magazines and regularly on Google to foment visibility on the main social media networks to help on the promotion of our Representations' products and brands.
- As representatives we are mostly focused on Embraer, the main airlines, such as, LATAM, GOL, AZUL and PASSAREDO, MROs, BJs and Helicopters Service Centers and Military Forces.
- As distributors and repair station we have over 1000 direct customers from all aviation segments (OEMs, MROs, helicopters, business, GA, ag. Acft. and military throughout the national territory).

Attention: Jacques Albuquerque, President

Subject: 2005 and 2006 Authorization Letter

Dear Mr. Albuquerque

This letter may be used to advise customers that Recominte is an authorized Eaton Aerospace, Aeroquip Fluid Conveyance Distributor in Brazil and throughout South America for Brazilian Airlines, Regional and Commuter Airlines, General Aviation, Fixed Base Operators, OEM's, Export Brokers and Government accounts. Recominte is also authorized by Eaton Aerospace, Fluid Conveyance to pursue new business opportunities during the design phase at OEM accounts on Eaton's behalf. Recominte distributes factory new products including but not limited to bulk hose and fittings, hose assemblies, quick disconnect self-sealing couplings, swivels, clamps, flanges, the Rynlok Tube Fitting Systems, etc. Recominte also operates an Eaton approved Hose Assembly Facility authorized to manufacture new hose assemblies (both Rubber and Teflon styles) as well as conduct repairs of hoses under Brazilian DAC Repair Station Operation CHE #0206-01 authority.

If you have any questions regarding the above, please contact the undersigned at your convenience.

Sincerely,

To Whom It may Concern:

With reference to Recominte and Jacques Albuquerque:

Recominte has been an authorized Eaton Aeroquip distributor since 2001. During that time period, Recominte has remained current on all accounts and fulfilled all business obligations in a timely and complete manner.

I have known Jacques Albuquerque personally over that same time period and have known him to accomplish all commitments.

If the recipient has any questions, please feel free to contact me at your convenience.

Sincerely,

Mark Morrow
Manager, Distribution
Eaton Aerospace

Our Certifications and References

To whom it may concern:

The Eaton Aerospace, Costa Mesa, CA. organization hired the Recominte organization in 2007 as part of an agreement with Embraer to provide local support during the initial build and test of the Phenom 100 aircraft. Eaton reviewed the capabilities of several Sao Jose Dos Campos companies and determined that Recominte offered the best support based on their capabilities and prior work with Embraer.

During the development period of the Phenom Program, the Recominte team provided on-site Technical Support for the initial aircraft builds. Their engineers worked closely with the Eaton engineers to solve problems and improve communication between ourselves and Embraer. Based on this relationship and solid performance by the Recominte team, Eaton continued the support agreement with Recominte even as the Phenom 100 & 300 ramped up production. As such, the Eaton technical team returned home while the Recominte team continued to provide on-site production line support at both the Gaviao Peixoto and Sao Jose Dos Campos sites in Brazil.

This support included:

- a. Technical assessment of product related issues during aircraft installation based on reported issues by Embraer Production and Quality teams
- b. Product assessments of aircraft removals and approval of product returns to Eaton Corp (No fault found or return to Eaton)
- c. Weekly problem reporting as required
- d. Product evaluation of switch removals coming off 145, 170 & 190 production lines
- e. Product upgrade and/or repair as defined by Eaton "Rework Instructions" which define the rework, test and approval for repaired items

The Eaton Costa Mesa business was sold to Sagem Avionics in May of 2014. The new management team continued to utilize Recominte as their local support based on the high ratings given by the Costa Mesa management team. This support continued until the recent announcement that the Phenom lines were moving to Melbourne, Florida.

The Eaton and Sagem Program Management and Quality team have been very pleased with the support provided by Jacques Albuquerque and his technical team at Recominte. We recommend Recominte for technical support, repair, assembly and test.

Sincerely;

A handwritten signature in blue ink that reads "Kelly Bristol".

LETTER OF REFERENCE

This is to attest that our company, Protection R.T.Inc. in Dorval, Quebec, Canada has done business with our international distributor, Recominte in Brazil for over fifteen years.

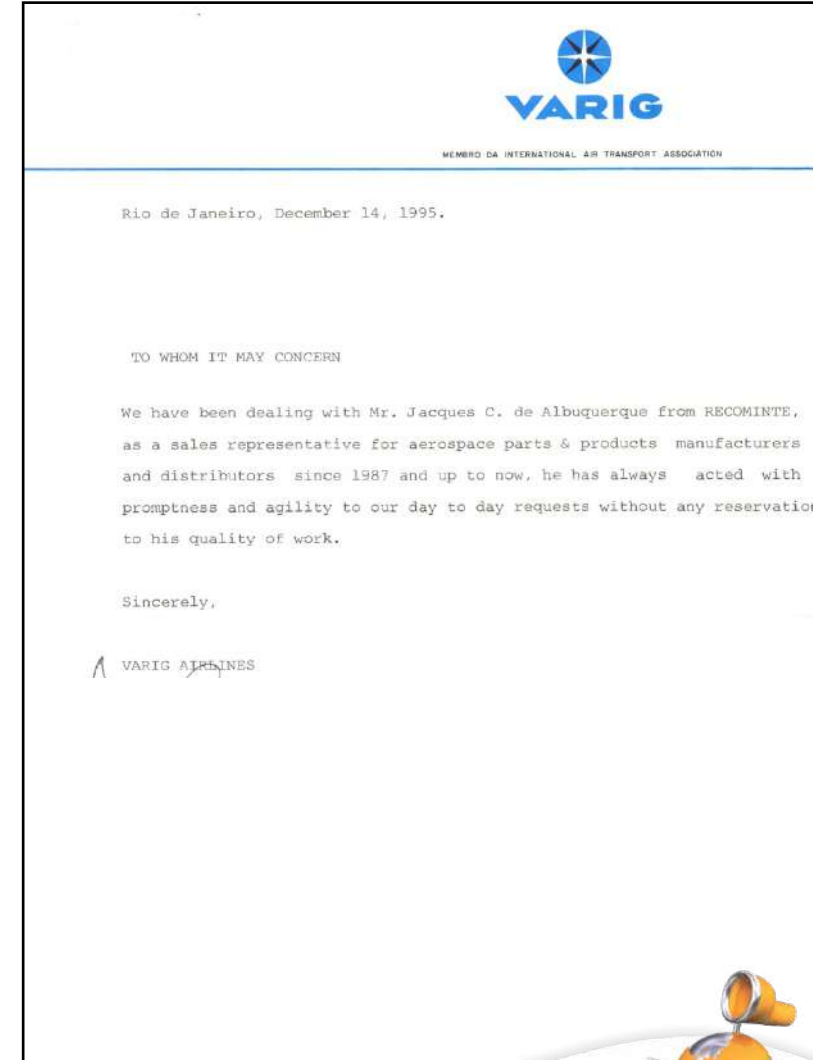

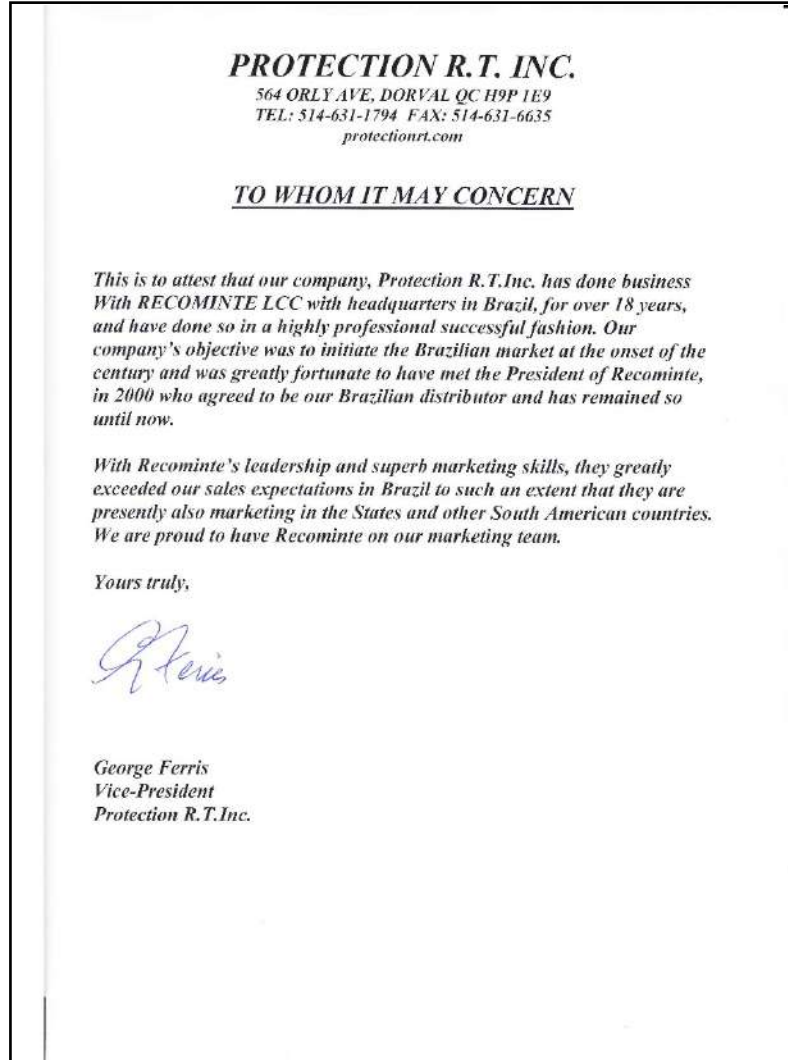

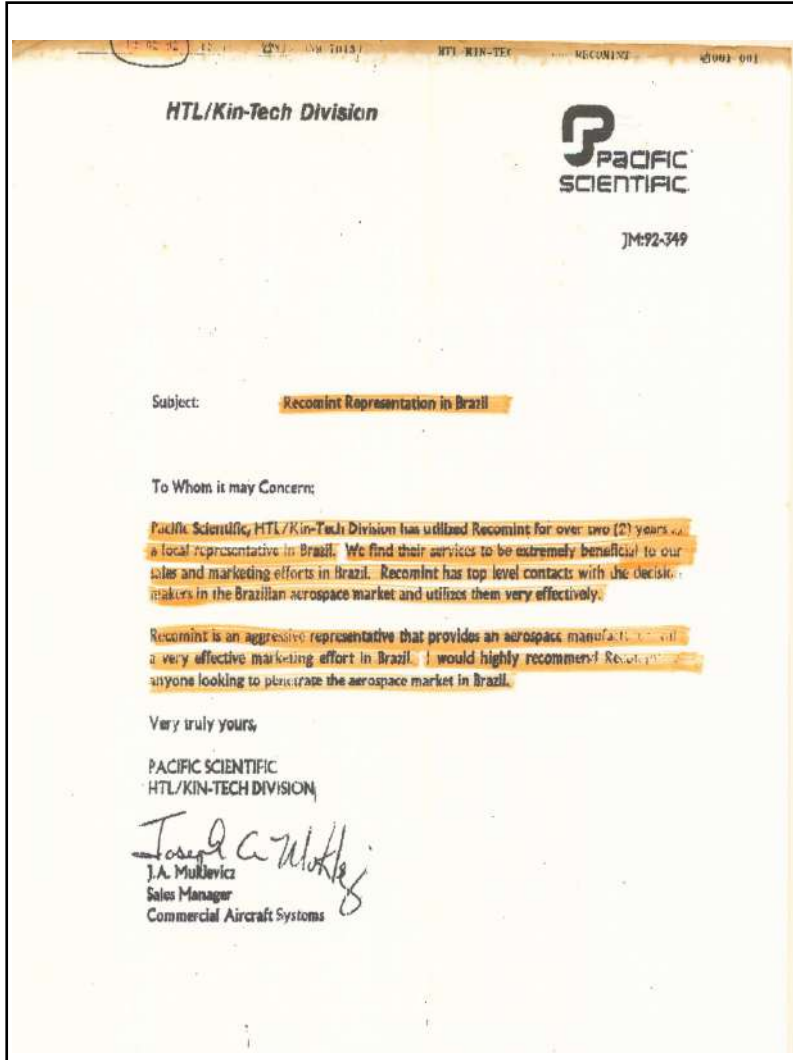

We have had excellent business relations with Recominte over this period, and have never had any financial or other problems with them. In fact, it has been a joy and privilege working with them, as I can vouch for them with no reservations.

Yours very truly,

Information about EMBRAER

- **EMBRAER**, recently was unified into one company again, as the sale to Boeing, of the commercial jets division did not happen.

They have three facilities in São José dos Campos. The headquarters and main production line at **Faria Lima** plant at the city airport (SJK), the **Eugenio de Melo** facility, where they have some production, such as tube assemblies and harnesses, plus administrative and engineering employees and finally the **EDE** facility where they design and build landing gears and other mechanic & hydraulic equipment.

- **Taubaté**, 30 Km north of SJC, where they have stocks and accommodate the Indirect Purchasing.
- **Gavião Peixoto** (GPX), 364 Km west of SJC, they have their main assembly line for the military programs and business jets. It is also where they have the longest runway used for flight tests and have a Service Center for the military aircraft.
- **Botucatu**, 319 Km Southwest of SJC, they have a lot of machining and assembly activities of parts to all the platforms. They also produce their agricultural aircraft, EMB-203 Ipanema.
- **Sorocaba**, 194 Km Southwest of SJC, they have their own a Service Center for Executive Jets.
- **São Paulo** , 90 Km south, the capital of the state they have the presidency, sales and finance teams.

Since 2018, many employees have retired, and many have been fired.

They are still on home office, except the production employees, but hopefully it will change in July 2022.

Our Actions with the customers

- We work with the Procurement Department to find the new procurement processes and Bids.
- Get in touch with related engineering in charge of the specification of the parts, products or systems, in order to have a better feeling of what to quote.
- Participate of the whole negotiation process.
- Participate of day-to-day contract administration up to the collection of the invoices.

Our Marketing Activities

Conclusion

Today, with almost 32 years in the Brazilian Aeronautical Market, RECOMINTE has a very good network from the top to the bottom of the companies, such as Embraer, operators and MROs.

Our team is composed of 16 people, being 2 engineers, 8 aeronautical mechanics and 6 in Sales, Administration and Purchasing.

Most people from the aviation business move from one to place to another and we can easily find them at EMBRAER, AZUL, GOL, LATAM, TAM EXECUTIVA, LIDER and others.

We hired the best Digital Marketing Agency in Brazil, called V4 Company. They will help to feed us with customers thru several Digital Marketing ways.

We are also very favorable in exhibiting at the shows to provide visibility to our Representations' brands and RECOMINTE's services. This year we will participate of two shows in Brazil.

We currently visit the most important customers who have gone back to presential work. We feel it is very important having technical persons in the team, that understands the systems, specifications standards and applications requirements, accompanying us on the sales calls in Brazil and always welcome our principals to do that at least once a year with us.

Conclusion

RECOMINTE has gone thru all the market oscillations since 1990 and has successfully made a reliable name in the Brazilian Aerospace Market.

Our philosophy it is to share this credibility with our principals, making them as close as possible to our customers.

We trust our local support brings credibility and adds value to our principal's reputation, providing more than just products, but a complete state of the art experience to satisfy our customer's expectations.

Thank you!
